

# NSF and the National Earth Science Prediction Capability

**Investments in fundamental science through  
NSF Atmospheric Science Programs:**

- *Physical and Dynamical Meteorology*
- *Climate and Large-Scale Dynamics*
- *Atmospheric Chemistry*
- **Sponsored Visitor Programs**
  - NCEP
  - Developmental Testbed Center

**Investments in community support  
through NCAR:**

- **Climate and Earth system modeling**
- **Weather modeling and prediction**
- **Computational studies**
- **Data assimilation**
- **Visualization**

National Science Foundation  
WHERE DISCOVERIES BEGIN

**Executive Order:  
Creating a National Strategic Computing Initiative  
(NSCI)**

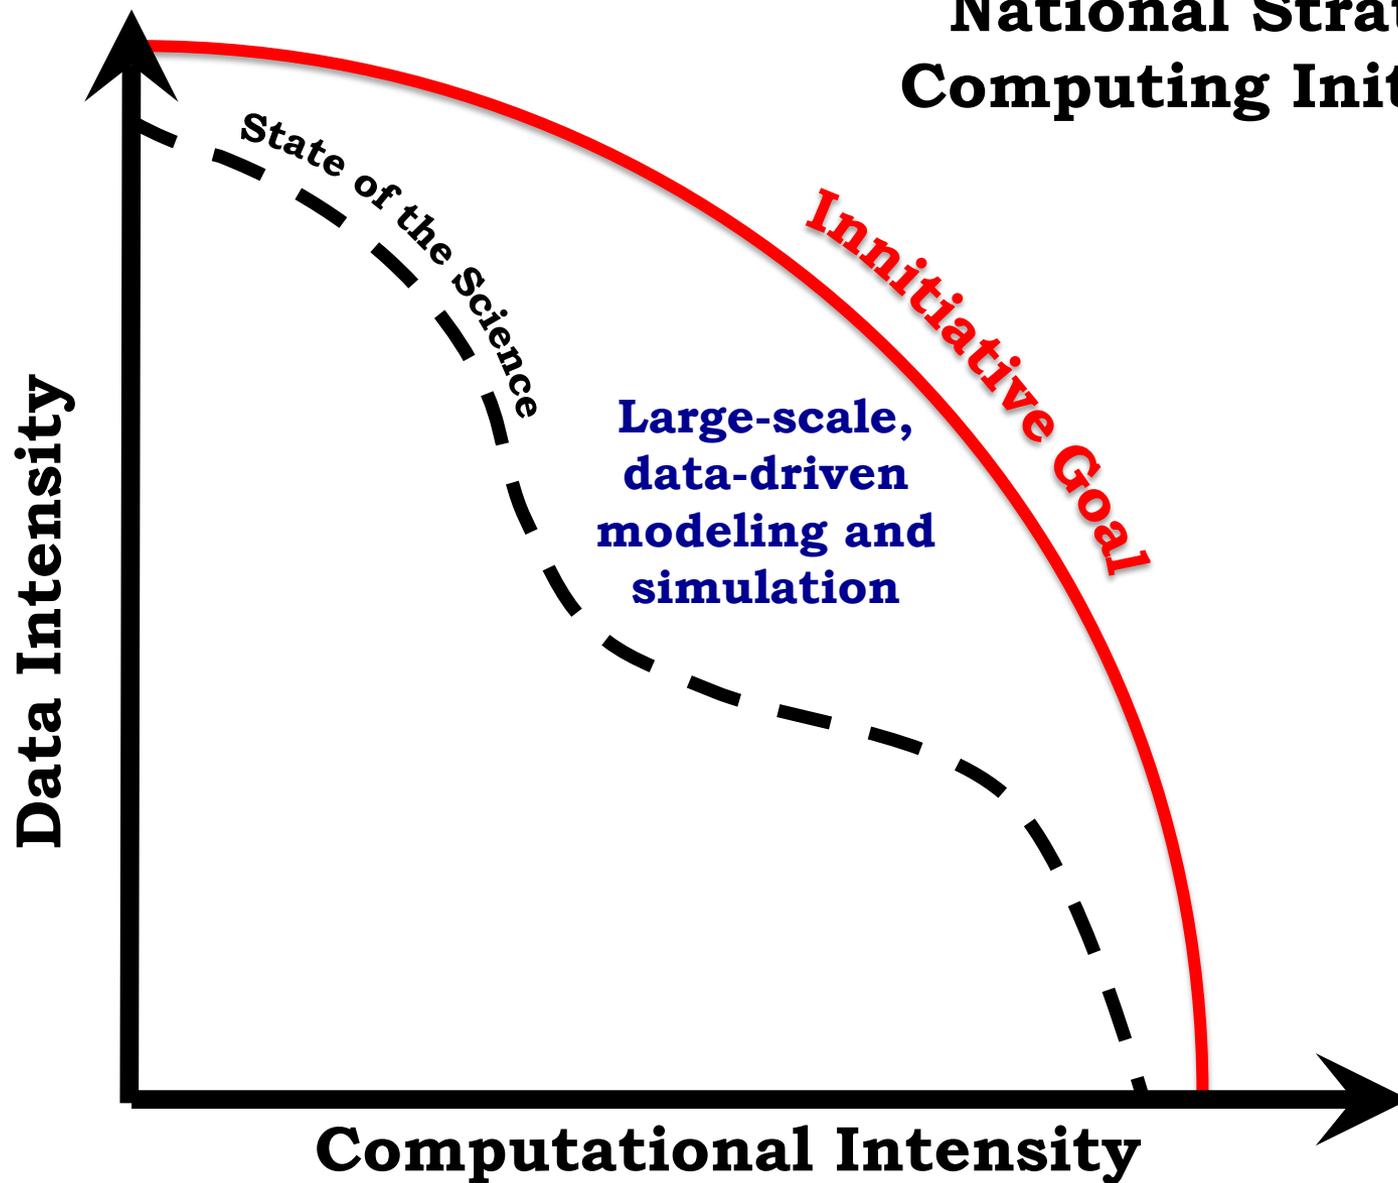

**Lead agencies: DoD, DoE, NSF  
Deployment Agencies: NASA, NOAA, DHS, FBI, NIH**

**Strategic Objectives:**

- **Accelerate delivery of capable exascale computing**
- **Increase technology coherence between modeling and data computing**
- **Extend beyond limits of current semiconductor technology**
- **Establish a sustained high-performance computing ecosystem**
- **Support public-private partnerships**

## National Strategic Computing Initiative

## National Strategic Computing Initiative

**Data Intensity**

### Discipline-specific initiatives for fundamental understanding:

- Earth system modeling
  - Global, regional
  - Climate, seasonal, sub-seasonal, weather
  - Extreme events
- Space weather modeling
  - Theoretical
  - Computational

**Computational Intensity**

Science

## National Strategic Computing Initiative

**Data Intensity**

### Cross-discipline advanced data assimilation initiatives for fundamental understanding:

- Advanced numerical techniques
- New observing systems
  - Assessment
  - Design
- Sensitivity to initial conditions using ensemble prediction systems
  - High-resolution models
    - Climate
    - Weather
    - Ocean
  - Quantification of uncertainty

**Computational Intensity**

## National Strategic Computing Initiative

**NSCI-related initiatives for FY 2017  
and beyond:**

- **Data assimilation**
- **Brain**
- **Water and food security**
- **Advanced manufacturing and engineering**
- **Advanced optics and photonics**

**Data Intensity**

**Computational Intensity**
